

Lice Screening and Treatment Services

This list may not be comprehensive. A quick Google search for professional lice treatment services in your area may yield more results.

Virtual Appointments (from your own home)

Both [Lice Happens](#) and the [Lice Doctors](#) offer virtual appointments over Zoom, where they will walk you through the steps of wet combing, screening, and identifying lice or nits in your camper's hair. While these appointments tend to be on the pricier end, they are very educational and offer tools and tips on screening and treating lice yourself.

Remember

Your camper will need a screening within 48 hours of arriving at camp. That is Friday or Saturday prior to Opening Day, or the Sunday morning before arriving at camp. If you are attending Mother-Daughter Weekend, your screening needs to be on Wednesday, Thursday, or Friday.

Cost

The cost of screenings may vary by location, hair length, or company. Most screenings are in the \$25-\$50 range.

Note

It's recommended to contact centers directly to confirm services, availability, and to schedule an appointment in advance.

Screenings

Screenings performed at urgent care centers, pediatrician offices, or general medical clinics are not sufficient for camp clearance. While we deeply respect and value medical professionals, these providers typically do not have the specific training or tools required to accurately detect lice and nits. For this reason, we require a screening by a lice-specific professional service.
